FIXED-FEE WORKSHOP

AI USE-CASE DISCOVERY WORKSHOP

Know where AI pays. Know what it needs.

A workshop-led review of your processes and data, ending with one pilot that is ready to approve.

€3,500
Fixed fee, excl. VAT

5 days
from workshop to go / no-go readout

For operations, supply-chain, procurement or finance leaders asked “what should we do with AI”.

What you take away

01	**Use-case shortlist**	Two to three AI use cases for your processes, each with the expected effect, the owner and the data it needs.
02	**Data-readiness check**	Which of the needed data exists, where and in what quality, and what is missing; one or two candidates tested on real samples.
03	**Pilot scope**	One pilot with success criteria, timeline and the people required, ready to approve, with a go or no-go recommendation.

Includes a half-day workshop with the process owners and IT in the room, and a joint readout.
You provide the process owner and one IT contact for the workshop and the readout, plus sample data for the candidates. The shortlist and the pilot scope are yours, whoever builds the pilot.

Why us

14+ years in data platforms, BI and AI

150+ delivered projects

15+ countries

Microsoft Partner

Databricks Consulting Partner

Snowflake Select Partner

Data engineering, BI and AI for FMCG and manufacturing, including Danone, Alpro and Nutricia.

Start with a 30-minute discussion

With our Principal Data & AI Architect to confirm scope, access and timing.
