FIXED-FEE REVIEW

DATA & BI HEALTH CHECK

Know what to improve. Know what it will take.

A focused review of your existing platform, with clear priorities for the next 90 days.

€7,000
Fixed fee, excl. VAT

3 weeks
10 days of senior-engineer work

For teams prioritising reliability, data quality, BI performance or platform costs.

What you take away

01	**Platform findings**	Full review of your pipelines, data quality, models and BI performance with AI tooling: every pipeline and report, not a sample, interpreted by senior engineers.
02	**90-day delivery plan**	A prioritised backlog with effort estimates, so you can plan what happens next.
03	**Cost view**	Main cloud, licence and people cost drivers, with risks and opportunities identified in the review.

Includes a one-hour management readout.
Scope agreed before we start: read access and around six hours of your team's time. You own the findings and the backlog. Use any team, or ask us to deliver the next steps.

Why us

14+ years in data platforms, BI and AI

150+ delivered projects

15+ countries

Microsoft Partner

Databricks Consulting Partner

Snowflake Select Partner

Data engineering, BI and AI for FMCG and manufacturing, including Danone, Alpro and Nutricia.

Start with a 30-minute discussion

With our Principal Data & AI Architect to confirm scope, access and timing.
